

Part C: Price List

Instructions to Applicant: Follow enclosed format for the price list, inserting the company name, description of service, location of service, prices and charges and other information applicable to your company.

Important Note: The attached Price List reflects the format, terms, and conditions acceptable to the Washington Utilities and Transportation Commission. Any deviation from the Definitions (Section 1) and the Rules and Regulations (Section 3) must be detailed on page 1 of the Price List and language included in appropriate Price List sections.

ROBERT SOKOTA – SENIOR VICE PRESIDENT AND GENERAL COUNSEL (C)

Regulations and List of Charges Governing the Provision
of Dedicated Communications Services Between Points
in the State of Washington

The Definitions (Section 1) and Rules and Regulations (Section 3) are identical to the Definitions and Rules and Regulations provided by the Commission except as follows:

Additional Definitions (Section 1):

“Company or MFNS” defined as Metromedia Fiber Network Services, Inc.

Additional Rules and Regulations (Section 3):

Metromedia Fiber Network Services, Inc. will require customer deposits and advance payments in accordance with Rules and Regulations 3.4.1 and 3.4.2.

The Paragraph Number Sequence is in accordance with the Price List Format found on Page No. 6.

PRICE LIST FORMAT

A. Page Numbering - Page numbers appear in the top center of the page. Pages are numbered sequentially. However, new pages are occasionally added to the price list. When a new page is added between pages already in effect, a decimal is added. For example, a new page added between pages 14 and 15 would be 14.1.

B. Page Revision Numbers - Revision numbers also appear in the top center of each page. These numbers are used to determine the most current page version on file with the Commission. For example, the 4th revised Page 14 cancels the 3rd revised Page 14. Because of various suspension periods, deferrals, etc., the most current page number on file with the Commission is not always the price list page in effect. Consult the Check Sheet for the page currently in effect.

C. Paragraph Numbering Sequence - There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:

- 2.
- 2.1.
- 2.1.1.
- 2.1.1.A.
- 2.1.1.A.1.
- 2.1.1.A.1.(a).
- 2.1.1.A.1.(a).I.
- 2.1.1.A.1.(a).I.(i).
- 2.1.1.A.1.(a).I.(i).(1).

Check Sheets - When a price list filing is made with the Commission, an updated Check Sheet accompanies the price list filing. The Check Sheet lists the pages contained in the price list, with a cross reference to the current revision number. When new pages are added, the Check Sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on this page if these are the only changes made to it (i.e., the format, etc. remain the same, just revised revision levels on some pages.) The price list user should refer to the latest Check Sheet to find out if a particular page is the most current on file with the Commission.

SECTION 1 - DEFINITIONS

Authorized User: An end user authorized by the customer to use the service.

Collect call: A billing arrangement where a call is billed to the called station.

Commission: The Washington Utilities and Transportation Commission.

Company or MFNS: Used throughout this price list to mean Metromedia Fiber Network Services, Inc., a Delaware Corporation.

Customer: The person, firm, corporation or other entity which orders or uses service and, has agreed by signature or otherwise to honor the terms of the service herein, and is responsible for the payment of rates and charges for service to call customer locations and for compliance with price list regulations.

Measured Service: The provision of intrastate long distance measured time communications telephone service to customers who access the carrier's service at its switching and call processing equipment by means of access facilities obtained from a local exchange common carrier. Carrier is responsible for arranging for the access lines.

Operator Station: A call that is completed with the assistance of an operator and billed to the calling party.

Person-to-Person: A call for which the person originating the call specifies to the operator a particular person, department or extension is to be reached. Person-to-Person charges only apply when the call is completed to the requested party or when the calling party agreed to talk to another person.

Third Party Billing: Service option that allows a call to be billed to an account different from that of the calling or called party.

SECTION 2 - SERVICES, LOCATION, PRICES AND CHARGES

2.1. DESCRIPTION OF SERVICE

This Price List applies to intrastate dedicated communications services supplied to Customers located throughout the State of Washington.

This Price List applies only to the extent that services provided hereunder are used by a Customer for the purpose of originating, terminating, or completing intrastate communications. A communication is "intrastate" only if all points of origination and termination are located within the State of Washington.

2.1.1. DS 1 SERVICE

A. Basic Description

DS1 Service provides for the two-way transmission of 1.544 Mbit/s digital signals, on a point-to-point basis only. DS1 Service can be provisioned on copper, fiber, or other suitable facilities, at the discretion of the Company. DS1 Service may be used for the transmission of voice, data, and video signals, or any combination thereof. DS1 Service is provided between two customer designated premises, between a customer designated premises and a Company Serving Wire Center, or between Company Serving Wire Centers. When DS1 Service is requested between two Company Serving Wire Centers, Central Office Multiplexers must also be ordered on each end (i.e., each Serving Wire Center) of the DS1 circuit, and a Private Line Transport service must be ordered from each Central Office Multiplexer to the customer premises.

DS1 Service may also be provided without framing. A Free-Framed DS1 signal shall have electrical characteristics identical to the framed 1.544 Mbit/s signals for DS1 Service with B8ZS, except for the lack of an apparent Frame Format. Free-Framing is not compatible with multiplexed DS1 Service. Free-Framed DS1 can only be provided where suitable equipment is available.

All Frame Format and line code combinations found in the Technical Publication are available for DS1 Service provisioned as point-to-point, or as

SECTION 2 - SERVICES, LOCATION, PRICES AND CHARGES (Cont'd)

2.1. DESCRIPTION OF SERVICE (Cont'd)

2.1.1. DS1 SERVICE (Cont'd)

B. Terms and Conditions

The terms and conditions specified in a DS1 Service Agreement, apply, in addition to the regulations set forth here.

1. Availability

- DS1 is available only on a two-point basis, twenty-four hours per day, seven days a week.
- DS1 Service can only be provided from wire centers equipped for digital transmission and is subject to the technical limitations of the central office equipment used by the Company.
- Where suitable facilities are unavailable for provision of the service, special construction of the facilities may be necessary and will be charged for as specified in Section 2.1.1.B.1.(a).
- A customer may request that the facilities used to provide DS1 Service be specially routed.

2.1. DESCRIPTION OF SERVICE (Cont'd)

2.1.1. DS1 SERVICE (Cont'd)

B. Terms and Conditions (Cont'd)

1. Availability (Cont'd)

(a) Special Construction

Subject to the arrangement of the Company and to all of the regulations contained in this Tariff, special construction of facilities may be undertaken on a reasonable efforts basis at the request of the Customer. Special construction is that construction undertaken:

- I. where facilities are not presently available, and there is no other requirement for the facilities so constructed;
- II. of a type other than that which the Company would normally utilize in the furnishing of its services;
- III. over a route other than that which the Company would normally utilize in the furnishing of its services;
- IV. in a quantity greater than that which the Company would normally construct;

2.1.1. DS1 SERVICE (Cont'd)

B. Terms and Conditions

2. Credit Allowance for Service Interruptions

For DS1 Self-Healing Alternate Route Protection and Self-Healing Alternate Route Protection Plus, out of service credit will apply when the customer experiences a service interruption and the system fails to switch to the protected electronics and/or facilities within one second. The protected electronics and/or facilities are between the Company Demarcation Point located on the customer premises and/or the Company Wire Center(s) associated with the Self-Healing Alternate Route Protection option. Such credit will be based on information provided by the network surveillance system associated with Self-Healing Alternate Route Protection Plus. In the event of a service interruption, one month's billing credit of the protected service will be given. Such credit will apply to the Channel Termination and the Self-Healing Alternate Route Protection rate element for Self-Healing Alternate Route Protection protected service. For Self-Healing Alternate Route Protection Plus protected circuits, credit will apply to the Self-Healing Alternate Route Protection Plus rate elements, Primary and Alternate Transport Channels, and the Self-Healing Alternate Route Protection Plus Central Office Termination (where applicable). Credit will be limited to a maximum of one month for an interruption or series of interruptions within that month.

SECTION 2 - SERVICES, LOCATION, PRICES AND CHARGES (Cont'd)

2.1. DESCRIPTION OF SERVICE (Cont'd)

2.1.1. DS1 SERVICE (Cont'd)

B. Terms and Conditions (Cont'd)

3. Payment Options

DS1 Service is offered on a month to month basis and on one through seven year Fixed Period Rate Plans as specified in Section 2.1.1.E.5.(d)., following.

4. Route Discounts

Route discounts are available for customers who purchase multiple, identical DS1 circuits between the same two customer designated premises (i.e., circuits must terminate at the same address). Route discounts are applicable only on the Channel Termination and Transport Mileage rate elements. The rates, as specified in Section 2, include the route discounts.

5. Custom Offering

If the standard service, as described and offered, does not meet a particular customer requirement, the customer may request and the Company may develop a Custom offering. The service, performance and/or optional features will be developed and rated on an individual case basis.

Title: Vice President -- Marketing

SECTION 2 - SERVICES, LOCATION, PRICES AND CHARGES (Cont'd)

2.1. DESCRIPTION OF SERVICE (Cont'd)

2.1.1. DS1 SERVICE (Cont'd)

C. End-link or Mid-link Application

This application is intended for customers requiring DS1 as part of an overall circuit extending beyond the Local Access Transport Area (LATA). A Design Layout Report (DLR) is available to the customer to assist in their overall design. The network channel interface between the Company facility and the remainder of the overall circuit is referred to as the Mid User DP. The network channel interface that is at the terminating end of the overall circuit is referred to as the End User DP.

D. End-to-End Application

This application is intended for customers requiring a DS1 service provided by the Company within the Local Access and Transport Area (LATA). No Design Layout Report (DLR) will be provided since the performance and maintenance will be the responsibility of the Company. The network channel interface at the terminating end of the overall circuit is referred to as the End User DP.

SECTION 2 - SERVICES, LOCATION, PRICES AND CHARGES (Cont'd)

2.1. DESCRIPTION OF SERVICE (Cont'd)

2.1.1. DS1 SERVICE (Cont'd)

E. Rate Categories

There are three basic rate categories which apply to DS1 Service:

- Channel Termination
- Transport Mileage
- Optional Features and Functions

1. Channel Termination

The Channel Termination provides for the communications path between the Demarcation Point at the customer designated premises, and the Serving Wire Center of that premises. One Channel Termination charge applies per DS1 terminated at the Demarcation Point. This charge will apply even if the customer designated premises and the Serving Wire Center are colocated in the same building.

PAGE NO. 17

SECTION 2 - SERVICES, LOCATION, PRICES AND CHARGES (Cont'd)

2.1. DESCRIPTION OF SERVICE (Cont'd)

2.1.1. DS1 SERVICE (Cont'd)

E. Rate Categories (Cont'd)

1. Channel Termination (Cont'd)

If a customer provides the Channel Facility Assignment (CFA) for the multiplexer of a higher capacity service, the DS1 Channel Termination charge does not apply between the Serving Wire Center and the customer's designated premises, connected by the higher capacity service.

- For example, if an end user wants to connect to an Interexchange Carrier's (IC) Point Of Presence (POP), and the IC provides CFA, the DS1 Channel Termination connecting the Serving Wire Center to the IC POP is not billed because the IC is already paying for that connection, via the higher capacity service. If the IC does not provide CFA, then the Company must provide the connection from the Serving Wire Center to the IC POP and the DS1 Channel Termination applies.

2.1. DESCRIPTION OF SERVICE (Cont'd)

2.1.1. DS1 SERVICE (Cont'd)

E. Rate Categories (Cont'd)

2. Transport Mileage

The Transport Mileage provides for the transmission facilities between the Serving Wire Centers associated with two customer designated locations. Transport Mileage is portrayed in mileage bands. There are two rate elements that apply for each band i.e., a fixed rate per band and a rate per mile. Transport Mileage is measured by airline miles between Serving Wire Centers via the V and H Coordinates Method, as set forth in the NATIONAL EXCHANGE CARRIER ASSOCIATION TARIFF F.C.C. No. 4.

2.1. DESCRIPTION OF SERVICE (Cont'd)

2.1.1. DS1 SERVICE (Cont'd)

E. Rate Categories (Cont'd)

3. Optional Features and Functions

Optional features and functions available where determined by the Company to be technically feasible.

(a). Central Office Multiplexer to Multiplexer Connecting Arrangement

This arrangement allows a customer to interconnect an individual DS1 channel of one multiplexer to an individual DS1 channel of another multiplexer. This feature is offered only when both multiplexers are located in the same central office. This feature may be optioned for the Bipolar with Eight Zero Substitution (B8ZS) line code.

(b). Clear Channel Capability

An arrangement that allows a customer to transport any framed sequence of binary ones and zeros through a 1.544 Mbit/s channel.

· Bipolar with Eight Zero Substitution (B8ZS) Option

This option requires the customer signal at the channel interface to conform to the B8ZS line code algorithm. This option allows B8ZS line code transmission through the network without being transcoded.

2.1. DESCRIPTION OF SERVICE (Cont'd)

2.1.1. DS1 SERVICE (Cont'd)

E. Rate Categories (Cont'd)

3. Optional Features and Functions (Cont'd)

(c). Central Office Connecting Channel

The Central Office Connecting Channel provides for connections within the same serving wire center between one customer leased DS1 Channel and a different customer leased DS1 channel provided by the Company (e.g., two like services installed as two separate services). One Central Office Connecting Channel charge applies per connection made.

(d). Automatic Loop Transfer (Automatic Protection Switching)

The Automatic Loop Transfer option provides against failure of metallic facilities between a customer designated premises and the Serving Wire Center for the premises. Protection is furnished through the use of a switching arrangement that automatically switches to a spare DS1 when the working DS1 fails. The spare DS1 is not included as a part of this option, and is charged for in addition to this option. This option requires compatible equipment at both the Serving Wire Center and the customer premises. The customer is responsible for providing the equipment at its premises. This feature is not available with channel having the B8ZS line code.

2.1. DESCRIPTION OF SERVICE (Cont'd)

2.1.1. DS1 SERVICE (Cont'd)

E. Rate Categories (Cont'd)

3. Optional Features and Functions (Cont'd)

(e). Self-Healing Alternate Route Protection

Self-Healing Alternate Route Protection provides added reliability to DS1 Service transported over fiber facilities. This feature provides a separate facility path to avoid any single point of failure for the protection system between the Serving Wire Center and the Company Demarcation Point, located in the same building as the customer designated premises, when the customer or building owner provides the structure for diverse entrance facilities into the building. In those instances where the customer or building owner requests the Self-Healing Alternate Route Protection Option but does not provide the structure for diverse entrance facilities into the building, this feature provides a separate facility path for the protection system between the first utility vault outside the Serving Wire Center (generally all facilities leave a wire center, to the first utility vault within the same conduit, cable, sheath, etc.) and the last terminal prior to the customer's premises.

2.1. DESCRIPTION OF SERVICE (Cont'd)

2.1.1. DS1 SERVICE (Cont'd)

E. Rate Categories (Cont'd)

3. Optional Features and Functions (Cont'd)

(e). Self-Healing Alternate Route Protection (Cont'd)

The added protection is provided by ensuring that backup electronics and two physically separate facility paths are used in the provisioning of the service. A primary (or working) service path is established between the Serving Wire Center and the customer designated premises. A secondary (or protect path) is provisioned between the customer designated premises and the Serving Wire Center via a Company designated Alternate Wire Center. Should the working path or electronics fail, or the service performance become impaired (i.e., the bit error rate degenerates to less than or equal to 10 to the minus 6 for a period of 10 consecutive seconds) the DS1 Service will automatically switch to the service protect path in order to maintain a near continuous flow of information between locations.

2.1.1. DS1 SERVICE (Cont'd)

E. Rate Categories (Cont'd)

3. Optional Features and Functions (Cont'd)

(e). Self-Healing Alternate Route Protection (Cont'd)

Due to constraints of the local network architecture as determined by the Company, there may be occasions where the service will be provisioned without the use of an Alternate Wire Center.

The offering of Self-Healing Alternate Route Protection contemplates the use of existing facilities. There may be occasions where the Self-Healing Alternate Route Protection option is not available due to facilities limitations, or where it may be necessary to construct such facilities, either as normal or Special Construction. If Special Construction is involved using a route or type of facility other than that which the Company would normally use, an additional charge to the recurring monthly rates for service, is applicable. The charge is equal to the difference between the charges of the specially constructed facilities and the recurring cost of the facilities the Company would have normally used. The additional charges will be designed to recover the additional costs over the requested service period of the Special Facilities Routing in order to allow all rates and charges to expire consecutively.

(f). Self-Healing Alternate Route Protection Plus

Self-Healing Alternate Route Protection Plus provides point-to-point facilities protection between customer designated premises or between customer designated premises and a Company Wire Center. This service is provisioned to avoid any single point of failure in the Company network. This option must be ordered in conjunction with the Self-Healing Alternate Route Protection option on one or both Channel Terminations of the DS1.

Self-Healing Alternate Route Protection Plus combines Self-Healing Alternate Route Protection for the local loop and will provide protection of the Transport Mileage facilities and the supporting electronics when applicable. In effect, this option will allow the Private Line Service to sustain any single point of failure whether the failure occurs in the Self-Healing Alternate Route Protection protected local loop or in the interoffice transport. The system will automatically detect the failure and switch to the alternate route.

(f). Self-Healing Alternate Route Protection Plus (Cont'd)

This option may be ordered to provide end-to-end circuit protection when the Self-Healing Alternate Route Protection option is ordered on each end of the circuit. It also may be ordered to provide facilities protection that terminates in a Company Wire Center. If the facilities terminate in a Company Wire Center, only that portion of the circuit with alternate routing provided will be protected. The offering of Self-Healing Alternate Route Protection Plus is subject to the same facility constraints and Special Construction charges, if applicable, as specified for Self-Healing Alternate Route Protection preceding.

Rates applicable to Self-Healing Alternate Route Protection and Self-Healing Alternate Route Protection Plus are in addition to the DS1 Channel Termination(s) and Transport Mileage, if applicable, on the primary portion of the circuit.

(g). Command A Link

This option allows the customer to control the reconfiguration of a Private Line Transport Service (digital or analog) on a near real-time basis, by means of the special provisioning of these services through a digital crossconnect device. Command A Link can accommodate the termination of circuits up to the 1.544 Mbit/s¹ and 44.736 Mbit/s² signal levels. Customer access to the reconfiguration capability is on the basis of a dial access arrangement. Terms and conditions, rates and charges for Command A Link are specified in Section 2.1.1.E.3.(h) below.

Command A Link is available only in selected serving wire centers.

¹ Applicable to Voice Grade, Digital Data, and DS1 Services.

² Applicable to DS1 and DS3 Service.

(h) Command A Link Network Reconfiguration Service

I. Description

Command A Link Network Reconfiguration Service provides the customer with the ability to reconfigure or rearrange their network from their premises at their convenience. The typical Command A Link network consists of these components:

- The circuits, which are purchased from elsewhere in this Tariff;
- The connection of these circuits to the Command A Link Digital Crossconnect System (DCS) ports;
- And the access to the network controller to rearrange the circuits.

The customer must specify the appropriate Network Channel Interface (NCI) and Network Channel (NC) codes. Information pertaining to the technical specifications and compatible channel interfaces are set forth in the Technical Publications listed under the Reference to Technical Publications preceding.

II. Service Elements

(i). Digital Crossconnect System (DCS) Ports

This element provides for the cross-connection between circuit terminations. Like circuits can only cross-connect to like circuits i.e., voice to voice, data to data, of like circuit design and transmission rates. Terminations are provided on the following ports:

- DS1 Port - Provides for the termination of a 1.544 Mbit/s digital circuit.
- DS3 Port - Provides for the termination of a 44.736 Mbit/s digital circuit.
- Virtual Port - Provides for the interconnection of compatible circuits of two separate Command A Link customers, by their mutual consent.

II. Service Elements

(ii). Network Controller

This element communicates customer commands to the DCS. Through these commands, customers are able to establish and rearrange the cross-connections between their circuit terminations.

(iii). Reconfiguration Options

- (1). Dial Up Access - Using a standard business or residence telephone line and customer-provided personal computer (PC) terminal and modem, this option provides the customer with the ability to execute their own commands for the reconfiguration of Command A Link circuits twenty-four hours a day.

IV. Terms and Conditions

- (i). The terms, conditions and regulations specified herein apply in addition to those specified for DS1 and DS3 Service, and in the General Regulations, Section 3, of this Tariff.
- (ii). Command A Link Service provides circuit termination cross-connections and the control of these cross-connections. It does not include the provisioning of circuits. Circuits are governed by their established terms and conditions.
- (iii). Cross-connection and control devices are located on suitable Company premises. Provisioning of Command A Link Service is subject to the availability of these devices.
- (iv). Both intraLATA and interLATA circuits may terminate on the same DCS, cross-connecting with like circuits, i.e., intraLATA to intraLATA and interLATA to interLATA.

5. Rate Regulations

This section contains specific regulations governing the rates and charges for DS1 Service. There are two types of rates and charges. These are monthly rates and nonrecurring charges described as follows.

(a). Monthly Rates

Monthly rates are flat rates that apply each month or fraction thereof that service is provided. These rates apply on a monthly basis. For billing purposes, each month is considered to have thirty days.

Date Issued: July 14, 1998

Effective Date: Aug

2.1. DESCRIPTION OF SERVICE (Cont'd)

2.1.1. DS1 SERVICE (Cont'd)

E. Rate Categories (Cont'd)

5. Rate Regulations (Cont'd)

(b). Nonrecurring Charges

Nonrecurring charges are onetime charges that apply for a specific work activity (i.e., installation or change to an existing service). The types of nonrecurring charges that apply for DS1 Service are:

- Service Provisioning Charge (Initial and Subsequent)
- Channel Termination
- Installation of Optional Features and Functions
- Service Rearrangements

Special construction charges, as defined in Section 2.1.1.B.1.(a).

I. Channel Termination

A nonrecurring charge applies for the installation of each Channel Termination and includes its predefined technical specifications and the facilities from the customer designated premises to the Serving Wire Center.

2.1.1. DS1 SERVICE (Cont'd)

E. Rate Categories (Cont'd)

5. Rate Regulations (Cont'd)

(b). Nonrecurring Charges (Cont'd)

II. Service Rearrangements

Service rearrangements are changes to existing (installed) services which do not result in either a change in the minimum billing period requirements or a change in the physical location of the Channel Termination at a customer designated premises. The charge to the customer for the service rearrangement is dependent on whether the change is administrative only in nature or involves actual physical change to the service. Changes which result in the establishment of new minimum billing period obligations are treated as disconnects and new connects. Changes in the physical location of the Channel Termination are treated as moves and are described in 2.1.1.E.5.(b).III., following.

All other service rearrangements will be charged for as follows and the appropriate Service Provisioning charge will apply in addition.

(b). Nonrecurring Charges (Cont'd)

II. Service Rearrangements (Cont'd)

- (i). If the change involves the addition of an optional feature or function which has a separate nonrecurring charge, that nonrecurring charge will apply.
- (ii). If the change involves changing Frame Format or Line Code, (e.g., AMI to B8ZS line code, SuperFrame to ANSI Extended Superframe, or any frame format to Free-Frame, or vice versa), or if the customer wishes to add Clear Channel Capability to an existing DS1 Service, only the following Service Rearrangement nonrecurring charge will apply. The Service Provisioning Charge is not applicable.

	NONRECURRING CHARGE
Service Rearrangement, per Channel Termination	\$154.00

III. Moves

A move involves a change in the physical location of one of the following:

- The Demarcation Point at the customer's designated premises
- The customer's premises

The charges for the move are dependent on whether the move is to a new location within the same building or to a different building.

(i). Moves within the Same Building or Between Buildings on the Same Premises

When the move is to a new location within the same premises or between buildings on the same premises, the move is the responsibility of the customer. There will be no change in the minimum billing period requirements.

III. Moves (Cont'd)

(ii). Moves to a Different Building (Cont'd)

- The customer's request for the disconnect order for the existing service must reference the new connect order,
- The new service installation must be completed within thirty calendar days of the disconnection of the old service, unless the installation delay is caused by the Company,
- If the customer's service is under a Fixed Period Rate Plan, an amendment to the existing agreement must be completed. The original expiration date of the agreement is not affected, unless the customer wishes to extend the term of the agreement.

(c). Mileage Measurement

Mileage Measurement will be as specified below:

- The mileage to be used to determine the monthly rate for the Transport Mileage is calculated using the airline distance between the locations involved, i.e., the Serving Wire Centers associated with two customer designated premises, a Serving Wire Center associated with a customer designated premises and a Company hub, or two Company hubs. The Serving Wire Center associated with a customer designated premises is the Serving Wire Center from which the customer designated premises would normally obtain dial tone.
- Transport Mileage is shown in terms of mileage bands. To determine the rate to be billed, first compute the mileage using the V & H coordinates method, as set forth in the NATIONAL EXCHANGE CARRIER ASSOCIATION Tariff F.C.C. No. 4, then find the band into which the computed mileage falls and apply the rates shown for that band. When the calculation results in a fraction of a mile, always round up to the next whole mile before determining the mileage band and applying the rate.

2.1.1. DS1 SERVICE (Cont'd)

E. Rate Categories (Cont'd)

5. Rate Regulations (Cont'd)

(c). Mileage Measurement (Cont'd)

- When bridging locations are involved, mileage is computed and rates applied separately for each section of the Transport Mileage. When any service is routed through a wire center for purposes other than customer specified bridging (e.g., the Company chooses to so route for test access purposes), rates will be applied only to the distance calculated between the serving wire centers associated with the customer designated premises.

- The mileage to be used in determining the monthly rate for the Self-Healing Alternate Route Protection and Self-Healing Alternate Route Protection Plus alternate route is calculated on the airline distance between the alternate wire centers utilized to provide Self-Healing Alternate Route Protection and Self-Healing Alternate Route Protection Plus on each end of the circuit. If the protection terminates in a Company wire center, the mileage to be used to determine the monthly rate for the alternate route is calculated on the airline distance between the alternate wire center providing Self-Healing Alternate Route Protection and Self-Healing Alternate Route Protection Plus and the Company wire center where the service terminates.

(d). Fixed Period Rate Plans

- I. A customer may subscribe to a one year through a seven year Fixed Period Rate Plan. If the customer terminates service prior to the expiration of the Fixed Period Rate Plan, termination charges specified in g. following will apply.
- II. For customers that subscribe to a Fixed Period Rate Plan, the monthly rates for the entire fixed period will be exempt from Company-initiated increases, at the rates in effect, in the tariff, for the fixed period on the service date the contract is signed by the customer and the Company.

If the rates decrease between the date the contract is signed and the date the service is installed, the customer will be billed the lower rate.
- III. If an Optional Feature is added to a circuit that is under an existing Fixed Period Rate Plan, the feature is rated based on the length of the original Fixed Period Rate Plan.

(d). Fixed Period Rate Plans (Cont'd)

- IV. Services rated under month to month billing may be upgraded to a Fixed Period Rate Plan at any time the customer chooses without incurring nonrecurring or discontinuance charges.
- V. A customer may renegotiate from an existing rate plan to a new rate plan at any time, with the condition that the new rate plan period must equal or exceed the number of months remaining in the existing rate plan.
- VI. Customers with service under a Fixed Period Rate Plan that is within 6 months of expiration may extend their Fixed Period Rate Plan rates for a period of 12 months, by notifying the Company in writing of their intent to do so. The 12 month extension will begin upon expiration of the existing Fixed Period Rate Plan. Extension of an existing Fixed Period Rate Plan is available only for the original customer of record of the service.

VI. (Cont'd)

At the end of the Fixed Period Rate Plan or of the extension (whichever is applicable), the customer must choose to:

- Renew the service under a new Fixed Period Rate Plan,
- Continue service under the month to month option,
- Or discontinue service.

If the customer renews the service, the monthly rates for a new Fixed Period Rate Plan will be the rates in effect, in the Tariff, on the renewal date. Should the customer not make a choice by the end of the existing Fixed Period Rate Plan or extension period, the rates will automatically revert to the month to month option.

SECTION 2 - SERVICES, LOCATION, PRICES AND CHARGES (Cont'd)

2.1. DESCRIPTION OF SERVICE (Cont'd)

2.1.2. DS3 SERVICE

A. Basic Description

DS3 Service provides a high capacity channel for the transmission of 44.736 Mbit/s isochronous serial data having a line code of bipolar three zero substitution (B3ZS). DS3 Service is provided between customer designated premises, between a customer designated premises and a Company Hub or between Company Hubs. DS3 Service is available utilizing an Electrical Interface. The interface will have the characteristics of its respective signal at the Demarcation Point.

Information pertaining to the technical specifications and compatible channel interfaces is set forth in the Technical Publications listed under the Reference to Technical Publications preceding.

2.1.2. DS3 SERVICE

B. Terms and Conditions

The terms and conditions specified in a DS3 Service Agreement apply, in addition to the regulations set forth here.

1. Availability

- DS3 is available only on a two-point basis, 24 hours per day, seven days a week.
- DS3 Service can only be provided from wire centers equipped for digital transmission and is subject to the technical limitations of the CO equipment used by the Company.
- Where suitable facilities are unavailable for provision of the service, special construction of the facilities may be necessary and will be charged for as specified in Section 2.1.1.B.1.(a), preceding.
- A customer may request the facilities used to provide DS3 Service be specially routed.

2.1.2. DS3 SERVICE (Cont'd)

B. Terms and Conditions (cont'd)

2. Credit Allowance for Service Interruptions

Credit allowance terms and conditions specified in this section are in addition to those specified in Section 3 following.

For DS3 Self-Healing Alternate Route Protection and Self-Healing Alternate Route Protection Plus, out of service credit will apply when the customer experiences a service interruption and the system fails to switch to the protected electronics and/or facilities within one second. The protected electronics and/or facilities are between the Company Demarcation Point located on the customer premises and/or the Company Wire Center(s) associated with the Self-Healing Alternate Route Protection option. Such credit will be based on information provided by the network surveillance system associated with Self-Healing Alternate Route Protection Plus. In the event of service interruption, one month's billing credit of the protected service will be given. Such credit will apply to the Channel Termination and the Self-Healing Alternate Route Protection rate element for Self-Healing Alternate Route Protection protected service. For Self-Healing Alternate Route Protection Plus protected circuits, credit will apply to the Self-Healing Alternate Route Protection Plus rate elements, Primary and Alternate Transport Channels, and the Self-Healing Alternate Route Protection Plus Central Office Termination (where applicable). Credit will be limited to a maximum of one month for an interruption or series of interruptions within that month.

SECTION 2 - SERVICES, LOCATION, PRICES AND CHARGES (Cont'd)

2.1. DESCRIPTION OF SERVICE (Cont'd)

2.1.2. DS3 SERVICE (Cont'd)

C. End-Link or Mid-Link Application

This application is intended for customers requiring Private Line Transport as part of an overall circuit, extending beyond the LATA. A Design Layout Report (DLR) is available to the customer to assist in their overall design. The network channel interface between the Company facility and the remainder of the overall circuit is referred to as the Mid User-DP. The network channel interface that is at the terminating end of the overall circuit is referred to as the End User-DP.

D. End-to-End Application

This application is intended for customers requiring an overall Private Line Transport by the Company within the LATA. No DLR will be provided since the performance and maintenance will be the responsibility of the Company. The network channel interface at the terminating end of the overall circuit is referred to as the End User-DP.

E. Rate Categories

There are three basic rate categories which apply to DS3 Service:

- Channel Termination
- Transport Mileage
- Optional Features and Functions

1. Channel Termination

The Channel Termination provides for the communications path between the Demarcation Point at the customer designated premises, and the serving wire center of that premises. One Channel Termination charge applies Per DS3 terminated at the Demarcation Point. For Capacity Channel Terminations larger than one DS3, the Capacity Channel Termination must be ordered before an associated Per DS3 Channel Termination can be ordered. These charges will apply even if the customer designated premises and the serving wire center are colocated in the same building. The Capacity Channel Termination can not be disconnected until all of the Per DS3 Channel Terminations are disconnected.

E. Rate Categories (Cont'd)

2. Transport Mileage

The Transport Mileage provides for the transmission facilities between the serving wire centers associated with two customer locations, between a serving wire center associated with a customer location and a Company Hub or between Company Hubs. Transport Mileage is portrayed in mileage bands. There are two rate elements that apply for each band i.e., a flat rate per band and a rate per mile. Transport Mileage is measured by airline miles between serving wire centers via the V and H Coordinates Method, as set forth in the NATIONAL EXCHANGE CARRIER ASSOCIATION TARIFF F.C.C. No. 4.

(c). Command A Link

This option allows the customer to control the reconfiguration of a Private Line Transport Service (digital or analog) on a near real-time basis, by means of the special provisioning of these services through a digital crossconnect device. Command A Link can accommodate the termination of circuits up to the 64 kbit/s¹, 1.544 Mbit/s², and 44.736 Mbit/s³ signal levels. Customer access to the reconfiguration capability is on the basis of a dial access arrangement. Terms and conditions, rates and charges for Command A Link are specified in Section 2.1.1.E.3.(h). preceding.

Command A Link is available only in selected serving wire centers.

¹ Applicable to Voice Grade, Digital Data, and DS1 Service.

² Applicable to Voice Grade and Digital Data Service.

³ Applicable to DS1 and DS3 Service.

SECTION 2 - SERVICES, LOCATION, PRICES AND CHARGES (Cont'd)

2.1. DESCRIPTION OF SERVICE (Cont'd)

2.1.2. DS3 SERVICE (Cont'd)

G. Rate Regulations

This section contains specific regulations governing the rates and charges for DS3 Service. There are two types of rates and charges. These are monthly rates and nonrecurring charges described as follows.

1. Monthly Rates

Monthly rates are flat rates that apply each month or fraction thereof that service is provided. These rates apply on a monthly basis. For billing purposes, each month is considered to have 30 days.

2. Nonrecurring Charges

Nonrecurring charges are one-time charges that apply for a specific work activity (i.e., installation or change to an existing service). The types of nonrecurring charges that apply for DS3 Service are: Channel Termination, installation of Optional Features and Functions, and Service Rearrangements. Special construction charges as defined in Section 2.1.1.B.1.(a). may also apply.

(a). Channel Termination

Nonrecurring charge applies for the installation of each Channel Termination and includes its predefined technical specifications and the facilities from the customer designated premises to the Serving Wire Center.

The nonrecurring charge applies for work to be performed on one Channel Termination, at a customer designated premises. The nonrecurring charge applies for new installation of a Channel Termination or for work to be performed on an

2.1. DESCRIPTION OF SERVICE (Cont'd)

2.1.2. DS3 SERVICE (Cont'd)

G. Rate Regulations (Cont'd)

2. Nonrecurring Charges (cont'd)

(b). Service Rearrangements

Service rearrangements are changes to existing (installed) services which do not result in either a change in the minimum billing period requirements or a change in the physical location of the Channel Termination at a customer designated premises. The charge to the customer for the service rearrangement is dependent on whether the change is administrative only in nature or involves actual physical change to the service. Changes which result in the establishment of new minimum billing period obligations are treated as disconnects and new connects. Changes in the physical location of the Channel Termination are treated as moves and are described in Section 2.1.2.G.2.(c).II.

- I. If the function involves the addition of an optional feature or function which has a separate nonrecurring charge, that nonrecurring charge will apply.
- II. If the change involves reterminating an existing DS3 Channel Termination onto a spare channel of a higher capacity service, the Channel Termination nonrecurring charge will apply.
- III. For all other changes, including the addition of optional features without separate nonrecurring charges, a charge equal to a Channel Termination nonrecurring charge will apply. Only one such charge

(c). Moves

A move involves a change in the physical location of one of the following:

- The Demarcation Point at the customer's designated premises
- The customer's premises

The charges for the move are dependent on whether the move is to a new location within the same building or to a different building.

I. Moves Within the Same Building or Between Buildings on the Same Premises

When the move is to a new location within the same premises or between buildings on the same premises, the move is the responsibility of the customer. There will be no change in the minimum billing period requirements.

II. Moves to a Different Building

A customer who has existing service may choose to move either a portion of or the entire existing service without incurring discontinuance charges provided

- The customer's request for both the disconnect order for the existing service and the new connect order for the new service are received at the same time.
- The customer's request for the disconnect order for the existing service must reference the new connect order,
- The new service(s) installation must be completed within thirty calendar days of the disconnection of the old service(s), unless the installation delay is caused by the Company;
- If the customer's DS3 service is under a Fixed Period Rate Plan, an amendment to the existing agreement must be completed. The original expiration date of the agreement is not affected, unless the customer wishes to extend the term of the agreement.

SECTION 2 - SERVICES, LOCATION, PRICES AND CHARGES (Cont'd)

2.1. DESCRIPTION OF SERVICE (Cont'd)

2.1.2. DS3 SERVICE (Cont'd)

G. Rate Regulations (Cont'd)

2. Nonrecurring Charges (cont'd)

(c). Moves (Cont'd)

II. Moves to a Different Building (Cont'd)

The monthly rates for the new service will be those rates in effect at the time the new service is installed. All nonrecurring charges apply for the new service. Should changes to either the disconnect order or the new connect order exclude one or more of the conditions above, applicable discontinuance and/or cancellation charges will be assessed, as specified in Section 3 following.

2.1. DESCRIPTION OF SERVICE (Cont'd)

2.1.2. DS3 SERVICE (Cont'd)

G. Rate Regulations (Cont'd)

3. Mileage Measurement

Mileage measurement will be as specified in Section 2.1.1.E.5.(c), in addition to the following:

- The mileage to be used in determining the monthly rate for the Self-Healing Alternate Route Protection and Self-Healing Alternate Route Protection Plus Alternate Route is calculated as specified under DS1 Service.

4. Fixed Period Rate Plans

Fixed Period Rate Plans for DS3 Service are offered under the same terms and conditions as those specified for DS1 Service.

5. Service Conversion

Service Conversion for DS3 Service is offered under the same terms and conditions as those specified for DS1 Service.

SECTION 2 - SERVICES, LOCATION, PRICES AND CHARGES (Cont'd)

2.1. DESCRIPTION OF SERVICE (Cont'd)

2.1.3. Contract Rates - Special Pricing Arrangements-ICB

- A. In lieu of the rates otherwise set forth in this tariff, rates and charges, including minimum usage, installation, special construction and recurring charges for Carrier's services may be established at negotiated rates on an ICB, taking into account the nature of the facilities and services, the costs of construction and operation, the volume of traffic, the length of service commitment by the Customer, and use of facilities by other Customers. Such arrangements shall be considered Special Pricing Arrangements, the terms of which will be set forth in individual Customer contracts. However, unless otherwise specified, the terms, conditions, obligations, and regulations set forth in this tariff shall be incorporated into, and become a part of, said contract, and shall be binding on Carrier and Customer. Specialized rates or charges will be made available to similarly situated Customers on a non-discriminatory basis. All special Pricing Arrangements, including ICB, shall be filed with the Washington Utilities and Transportation Commission.

- B. In addition to any rate or charge established by the Carrier, the Customer will also be responsible for any recurring or non-recurring charges imposed by local exchange telephone companies incurred by or on behalf of the Customer in establishing and maintaining service. Such charges may be billed by the Carrier or directly by the local exchange company, at the Carrier's option.

SECTION 2 - SERVICES, LOCATION, PRICES AND CHARGES (Cont'd)

2.1. DESCRIPTION OF SERVICE (Cont'd)

2.1.4 Back Billing

Carrier shall be entitled to revise bills previously rendered to adjust for previously rendered unbilled service, or adjust upward a bill previously rendered, assuming that the Customer was aware of the unbilled services during the period the services were unbilled, for a period of six years after the service was rendered.

2.1.5 Temporary Promotional Programs

The Carrier may establish temporary promotional programs, wherein it may waive or reduce recurring or non-recurring charges, to introduce a present or potential Customer to a service not previously received by the Customer. The terms of promotional programs will be filed with the Washington Utilities and Transportation Commission subject to the requirements of applicable law, except if the promotion is to reduce rates.

SECTION 3 - RULES AND REGULATIONS

3.1. ADOPTION OF RULES OR REGULATORY AUTHORITIES

The rules regulating Competitive Classified Companies presubscribed by the Commission are adopted and by this reference are made a part of this price list unless otherwise waived by order of the Commission.

3.2. INTERCONNECTION

Interconnection with the facilities or service of other carriers shall be under the applicable terms and conditions of the other carrier's tariffs. The customer is responsible for taking all necessary legal steps for interconnecting customer-provided terminal equipment or communications systems with carrier's facilities. The customer shall secure all licenses, permits, right-of-way, and other arrangements necessary for such interconnection. Any special interface equipment of facilities necessary to achieve compatibility between the facilities of the carrier and other participating carriers shall be provided at the customer's expense.

3.3. APPLICATION FOR SERVICE

Application for service may be made verbally or in writing. The name(s) of the customer(s) desiring to use the service must be set forth in the application for service.

Date Issued: July 14, 1998

Effective Date: Aug

Issued by: Metromedia Fiber Network Services, Inc.
By: John McLeod

Title: Vice President -- Marketing

SECTION 3 - RULES AND REGULATIONS (Cont'd)

3.4. CUSTOMER DEPOSITS AND ADVANCE PAYMENTS

3.4.1 Advance Payments

To safeguard its interests, the Company may require a Customer to make an advance payment before services and facilities are furnished. The advance payment will not exceed an amount up to two months of estimated monthly usage charges. In addition, where special construction is involved, the advance payment may also include an amount equal to the estimated non-recurring charges for the special construction and recurring charges (if any) for a period to be set between the Company and the Customer. The advance payment will be credited to the Customer's initial bill. An advance payment may be required in addition to a deposit.

Date Issued: July 14, 1998

Effective Date: Aug

Issued by: Metromedia Fiber Network Services, Inc.
By: John McLeod

Title: Vice President -- Marketing

SECTION 3 - RULES AND REGULATIONS (Cont'd)

3.4. CUSTOMER DEPOSITS AND ADVANCE PAYMENTS (Cont'd)

3.4.2 Deposits

- A. To safeguard its interests, the Company may require the Customer to make a deposit to be held as a guarantee for the payment of charges. A deposit does not relieve the Customer of the responsibility for the prompt payment of bills on presentation. The deposit will not exceed an amount equal to:
1. three months' charges for a service or facility which has a minimum payment period of one month; or
 2. the charges that would apply for the minimum payment period for a service or facility which has a minimum payment period of more than one month; except that the deposit may include an additional amount in the event that a termination charge is applicable.
- B. A deposit may be required in addition to an advance payment.
- C. When a service or facility is discontinued, the amount of a deposit, if any, will be applied to the Customer's account and any credit balance remaining will be refunded. Before the service or facility is discontinued, the Company may, at its option, return the deposit or credit it to the Customer's account. If the amount of the deposit is insufficient to cover the balance due to the Customer's account, the Company retains the right to collect any amounts owing after the deposit has been applied plus any costs related to the collection of any remaining balance.
- D. Deposits held will accrue at an annual interest rate set by the Washington Utilities and Transportation without deductions for any taxes on such deposits. Interest will not accrue on any deposit after the date on which reasonable effort has been made to return it to the Customer. (C)
(C)

Date Issued: January 2, 2001

Effective Date: February 2, 2001

Issued by: Metromedia Fiber Network Services, Inc.

By: Robert Sokota

Title: Senior Vice President and General Counsel (C)

SECTION 3 - RULES AND REGULATIONS (Cont'd)

3.5. PAYMENT AND BILLING

- 3.5.1. Service is provided and billed on a monthly basis in arrears.
- 3.5.2. Initial billing for set-up and installation charges or monthly service fees will not commence for any new customer until the customer has actually been placed in service.
- 3.5.3 Billing will be payable upon receipt and past due 15 days after issuance.

3.6. CANCELLATION BY CUSTOMER

- 3.6.1. Cancellation of service by the customer can be made either verbally or in writing and is applied pursuant to WAC 480-120-081(1) as follows:
 - A. Where an application for service is canceled by the customer prior to the start of any design work or installation of facilities, no charge applies.
 - B. When an application which requires special design work is canceled after the design work has begun, the company may collect charges equal to the cost incurred for the associated design work to date.
 - C. If cancellation is requested after completion of an installation, it will be treated as a discontinuance of service. Any minimum contract requirements of prescribed service will be applicable.

3.7. DISCONNECTION OF SERVICE BY CARRIER

- 7.1. The carrier may discontinue for any of the following reasons:
 - A. Nonpayment of bills;
 - B. Tampering with the company's property;
 - C. Vacation of the premises by subscriber;

Date Issued: July 14, 1998

Effective Date: Aug

Issued by: Metromedia Fiber Network Services, Inc.
By: John McLeod

Title: Vice President -- Marketing

SECTION 3 - RULES AND REGULATIONS (Cont'd)

3.7. DISCONNECTION OF SERVICE BY CARRIER (Cont'd)

3.7.1. (Cont'd)

- D. Violation of rules, service agreements, or filed price list;
- E. Use of subscriber equipment which adversely affects the company's service to its other subscribers;
- F. Fraudulent obtaining or use of service; or,
- G. Unlawful use of service or use of service for unlawful purposes.

3.7.2. Except in case of danger to life or property, fraudulent use, impairment of service, or violation of law, the carrier will, prior to disconnection, mail written notice of the pending disconnection to the subscriber. The company will not disconnect service prior to the eighth business day following mailing of the notice. In the alternative, the company may provide delivered notice and disconnect not prior to 5:00 p.m. of the next business day, in accordance with WAC 480-120-081(5).

3.7.3. Before service is disconnected, the company will make a good faith effort, by two attempts during reasonable hours, to reach the subscriber by telephone to advise the subscriber of the pending disconnection and the reasons therefor. The company will maintain a log or record of the attempts, showing the telephone number called and the time of call. In the alternative, the company may provide personal notice in accordance with WAC 480-120-081(5). Telephone or personal contact need not be attempted when the company has attempted such contact in any two billing periods during a consecutive twelve-month period and the company has notified the subscriber in writing that telephone or personal contact will not be attempted in the future before disconnecting service.

3.7.4. All notices of delinquency or pending disconnection will include details pertinent to the situation and describe how the subscriber can make contact with the company to resolve any differences. All notices must accurately state amounts owing for service(s) which are subject to disconnection. A new notice will be required in cases where information is incorrect.

SECTION 3 - RULES AND REGULATIONS (Cont'd)

3.7. DISCONNECTION OF SERVICE BY CARRIER (Cont'd)

3.7.5. Except in case of danger to life or property, no disconnection shall be made on Saturdays, Sundays, legal holidays, or on any other day on which the company cannot reestablish service on the same or following day.

3.7.6. When the company has reason to believe service is to other than the subscriber of record, the company shall undertake reasonable efforts to inform occupants of the service address of the impending disconnection. In this case, at the request of the service users, a minimum period of five business days will be allowed to permit the service users to arrange for continued service.

3.7.7. Where service is provided to a hospital, medical clinic with resident patients, or nursing home, notice of pending disconnection shall be provided to the secretary, Washington State Department of Social and Health Services, as well as to the subscriber. Upon request from the secretary or his designee, a delay in disconnection of no less than five business days from the date of notice will be allowed so that the department may take whatever steps are necessary in its view to protect the interests of the resident patients.

3.7.8. The company may not immediately disconnect service if the customer has met the requirements of WAC 480-120-081(3) regarding a medical emergency.

3.7.9. Service will not be totally disconnected while a subscriber is pursuing any remedy or appeal provided for by Commission rules, provided any amounts not in dispute are paid when due.

3.7.10. Service will be restored when the causes of discontinuance have been removed and when payment or satisfactory arrangements for payment of all proper charges due from the customer has been made as provided for in the price list of the carrier.

3.8. INTERRUPTION OF SERVICE

3.8.1. The company will follow the Commission's rules (WAC 480-120-520) in the case of major outage and/or service interruption.

SECTION 3 - RULES AND REGULATIONS (Cont'd)

3.8. INTERRUPTION OF SERVICE (Cont'd)

3.8.2. It is the obligation of the customer to notify the carrier of any interruptions in service. Before giving such notice, the customer shall ascertain that the trouble is not being caused by any action or omission of the customer, not within the customer's control, or is not in wiring or equipment connected to the terminal of the carrier.

3.8.3. All reported interruptions of service will be restored within two working days, excluding Sundays and holidays, except those caused by emergency situations, unavoidable catastrophes and force majeure.

3.9. RESTORATION OF SERVICE

The use and restoration of service in emergencies shall be in accordance with Part 64, Subpart D of the Federal Communications Commission's Rules and Regulations, which specifies the priority system for such activities and in compliance with WAC 480-120-520.

3.10. TAX ADJUSTMENT

The Company concurs in the Municipal Utility Occupation tax schedules of each Local Exchange Company tariff in the state of Washington to the extent those local taxes are both current and applicable to the services the Company provides. This amount will be separately stated on each bill to the customer.
